

Enjoy the Warmth, Relish the Savings

Say goodbye to rising heating bills! Econo-Heat Electric Panel Heaters are the efficient, safe, versatile and low-cost solution to staying warm this winter. Econo-Heat guarantees energy efficient heating for as little as 3 cents per hour.* Our heaters are easy to install, safe to use, will compliment any interior decor and will out-perform all conventional heating systems for efficiency, economical running and installation costs.

Enjoy new, healthy and environmentally friendly warmth for you and your family. The Econo-Heat system is ideal for asthma and allergy sufferers because their gentle warmth won't dry out the air, blow dust and allergens around a room or emit any harmful pollutants.

With no moving parts or exposed elements, the EconoHeater requires no maintenance and will last for many years – giving you hassle-free heating! And with no noisy fan or clicking thermostat you can relax and sleep peacefully in the 'velvet quietness' of Econo-Heat warmth.

Ultra Efficient

The Econo-Heat electric panel heater is a slim panel that mounts to a wall with small spacers (provided with heater). The resulting air gap formed between the back of the panel heater and the wall provides tremendously efficient convection heat.

Safe

The Econo-Heat electric panel heater has no exposed heating elements (where dust buildup could cause a fire) and has a safe surface temperature that will not burn the skin or other materials. Without the need of a fan, long hair and little fingers are safe from entanglement. Easy mounting to a wall ensures tip-over hazards are a thing of the past.

Economical

The Econo-Heat electric panel heater uses less power than the average computer (~400 watts) yet one EconoHeater can easily heat an average sized bedroom (10 ft x 10 ft room with adequate insulation). They cost about 3 cents per hour to run based on the national US average power cost of 8 cents per kilowatt hour.*

Stylish

The Econo-Heat electric heater is a slim, discreet and stylish panel with *super clean lines*, measuring 24 inches x 24 inches with an overall depth of 1 inch when mounted to the wall.

Versatile

The Econo-Heat electric heater can be painted to match any decor and can be mounted against any type of wall surface. Econo-Heaters can be installed in every application conceivable including every room in a home or at the office. You can even install EconoHeaters in individual areas and turn off the central heat! Not only will you make everyone happy by giving them their own heat, but you will save money as well.

ELECTRIC PANEL HEATER

425 Watts

Heats a 100 sq. ft. area

Model #0601

Energy Efficient Heating Technology Breakthrough

Econo-Heat space heater panels are the efficient, versatile and low-cost solution to keeping warm in winter. The Econo-Heat electric heater operates mainly by heat convection. Designed to be left on for long periods of time, the ECONO-HEAT electric heater panel operates at relatively low surface temperatures, thereby giving a constant, gentle background heat whilst using very little electricity. This concept is similar to a baseboard heater and performs the same task as central heating systems, however the ECONO-HEAT electric space heater is far less expensive to purchase, install and operate - keeping you comfortably warm, for less!

Testimonials

"I purchased several panels for my home last winter then turned down my central heating to almost nothing. Whilst there was a minimal increase on my electric bill, my gas therms usage went down by over 50%. My EconoHeaters paid themselves off in less than 3 months!"

Don Barnes, Belvidere, IL

"The heat feels natural as it fills the room but the best part is the cost effectiveness!"

Dave Levandowski, CA

"We appreciate working with a company such as Econo-Heat that can further our mission - promoting lifelong vitality."

Charles Valero, Mother Lifeways Assisted Living Care

"The warmth from this heater can only be described as velvet!"

Alison Chalmers, IL

"...big thumbs-up with me and my family as we haven't seen an increase in our electric bill at all!"

Susan Brewer, NY

"I have saved hundreds of dollars on my heating bills and I have spread the word about my wonderful Econo-Heat panel heaters, literally, from sea to shining sea!"

Ruth Womack, OR

"...nicely crafted, easy to install and operate, beautifully priced. Top notch product and support; Econo - Heat is my heating choice !"

Igor Khait, NY

"...it's 'cashmere heat' because it feels so soft and is peacefully quiet...we are able to hear the waves of Lake Superior outside our bedroom window."

Susan Manson, MI

"...we needed to heat our basement with a low power usage and didn't want the kids burning themselves. Econo - Heat met all these needs! We have been using the heaters for over a year and my wife and I love them...quiet, efficient, and safe."

Peter Gunneau, WI

Features

- Energy Efficient - as little as 3 cents per hour
- 425 watts heats a 10 ft. by 10 ft. room
- Can replace central heating or gas/fuel boilers
- Can be used as supplemental heat if required
- Low surface temperature
- Safe for children, seniors and pets
- Slim discreet and stylish
- Easily installed
- No wiring required
- Plugs into 120 volt outlet
- Extremely reliable
- No moving parts or exposed heating elements
- Promotes healthy homes and office conditions
- Doesn't dry out air or blow dust and allergens
- No fan required - silent operation
- Can be painted any color
- Environmentally friendly - conserves fossil fuel
- 18 month warranty
- UL and CSA safety approved

Installation

The Econo-Heat panel heater is very simple to install. An installation kit and instructions are included with every heater. Typical installation time is no longer than 5 to 10 minutes.

Accessories

Timers, thermostats and telephone controllers can be used for additional control and for hardwiring the EconoHeater. Please visit our website for accessory product details.

Specifications

Size - 24" x 24" X 1/2" thick
